

WHAT IS THE IMPORTANCE OF SPORTSMETRICS

Each year, an estimated 300,000 individuals sustain a tear to the anterior cruciate ligament (ACL) in the knee joint. The ACL is crucial in providing stability to the knee during sporting activities such as running, jumping, cutting and pivoting. An ACL tear will result in loss of a full season, school time, and possibly a scholarship or entire sporting career. Female athletes are 4-8 times at risk of an ACL injury compared to male athletes.

THE ISSUE

DID YOU KNOW

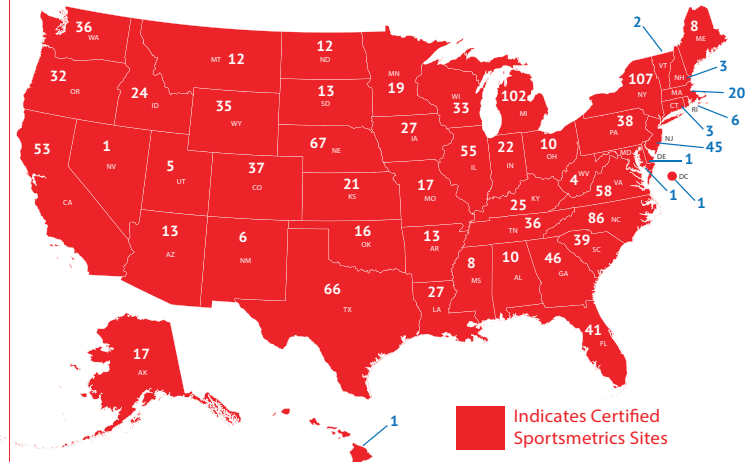

Statistically, 76 out of 100 000 girls and 47 out of 100 000 boys aged 10 through 19 will suffer an ACL injury each year

SPORTSMETRICS IS MAKING A DIFFERENCE

WHAT IS THE IMPACT OF SPORTSMETRICS

NATIONAL & INTERNATIONAL IMPACT

UNITED STATES

1390

Over the last 10 years, Sportsmetrics has certified a mixture of Physical Therapists, Athletic Trainers, Strength & Conditioning Coaches and more. There are currently 1390 Certified sites with more becoming certified each year. In those sites there are a total of 2344 certified individuals.

14

INTERNATIONAL

Sportsmetrics is proud to be the only scientifically proven ACL Injury Prevention Program that is represented both nationally and internationally. There are currently 14 countries that are certified to use the Sportsmetrics program.

Decrease in ACL injuries in athletes who participate in neuromuscular training

72%

American Academy of Pediatrics Statement: "Pediatricians and orthopedic surgeons who work with schools and sports organizations are encouraged to educate athletes, parents, coaches, and sports administrators about the benefits of neuromuscular training in reducing ACL injuries and direct them to appropriate resources."

Over 20 years ago, Dr. Frank Noyes and the researchers at the Noyes Knee Institute developed Sportsmetrics, a scientifically proven neuromuscular training program designed to build overall leg strength and improve balance, stability and body mechanics during jump/land tasks. Since the program was established, over 25 studies have been published proving the effectiveness of the Sportsmetrics program.
